

**Amendments to the Claims**

In Items 2, 3, 4, 5, 6, and 7 of his response the examiner rejected Claims 1 - 6 under 35 U.S.C. 112, second paragraph. In reply the claims are amended as follows:

- a1
1. (Currently amended) - A resilient, elastic, dimensionally dynamic, mobile ~~method~~ product of adhesive wood joinery complete in itself without fasteners, joinery millwork or supporting structures wherein said joinery comprises a layer of resilient, elastic, dimensionally dynamic, mobile material forming an adhesive joint between two or more individual wooden elements wherein an individual wooden element is a single piece of wood more than one-twentieth of an inch thick and more than one eighth of an inch wide and more than two inches long and wherein a joint is a means of holding individual wooden elements in their correct positions relative to one another, and wherein a layer is a thickness of material greater than 0.
  2. (Currently amended) - The joinery of Claim 1 wherein the joints exhibit hinge like flexibility ~~in many different directions.~~
  3. (Original) - The joinery of Claim 1 wherein the individual wooden elements move freely and independently of each other.
  4. (Original) - The joinery of Claim 1 wherein the adjoining edges of the individual wooden elements contact each other.
  5. (Original) - The joinery of Claim 1 wherein the wooden elements joined are not displaced permanently by impact or expansion but are drawn back to their original position.

a1

6. (Original) - The joinery of Claim 1 wherein the wooden elements joined need not be precisely milled or fitted for a perfectly tight joint to be formed.
